

SURYAKANTA BHOI

Skills: Python, Gen-AI, Agentic-AI, LangChain, LangGraph, RAG, Prompt Engineering, FastAPI, pgvector, OpenAI APIs

Mobile: +91-8249504430 | suryakantbhoi79@gmail.com

CAREER OBJECTIVE

AI Engineer with 5+ years of software development experience and 2 years in AI/LLM systems, seeking to build scalable, production-grade Generative AI solutions using Python, LLM architectures, and microservice-based AI workflows in a high-impact, collaborative environment.

PROFESSIONAL EXPERTISE

- AI Engineer with 2 years of hands-on experience in LLM-powered application development, supported by 5+ years of overall experience in Python, ERP application development, and scalable system delivery.
- Strong expertise in Generative AI (GenAI), LangChain, LangGraph, Retrieval-Augmented Generation (RAG), and Prompt Engineering for production-grade AI solutions.
- Hands-on experience with agent-based workflows, multi-agent systems, and agentic AI patterns including tool calling, multi-step reasoning, and human-in-the-loop orchestration.
- Proficient in integrating LLM/AI models via RESTful APIs into scalable, secure Python microservice-based applications.
- Experienced with vector databases including PostgreSQL (pgvector), FAISS, and Chroma for embedding storage, semantic search, and retrieval pipelines.
- Strong understanding of ERP application architecture, with proven ability to design, develop, and deliver custom modules and AI-enhanced enterprise workflows.
- Competent in mapping client requirements to technical specifications, designing, testing, and implementing AI and ERP solutions productively.

EMPLOYMENT SUMMARY

Software Engineer (AI & ERP) | CSM Technologies | December 2021 – Present | 4.6 Years

- Building LLM-powered and Generative AI solutions, including RAG pipelines, AI chatbots, and agentic microservice architectures.
- Developing and maintaining ERP modules with AI enhancements, integrating LLM capabilities into enterprise workflows.
- Leading end-to-end delivery of production AI systems from requirements to deployment.

Intern – Software Developer | Casper Technology Services Pvt. Ltd. | May 2021 – November 2021 | 6 Months

- Contributed to web application development using Python and related frameworks, including REST API development and UI integration.

TECHNICAL PROFICIENCY

Category	Skills
AI & LLM	Generative AI, RAG, Agentic AI, Prompt Engineering, LangChain, LangGraph, Vector DBs (pgvector, FAISS, Chroma), OpenAI APIs, Chatbot Development
Languages & Frameworks	Python, FastAPI, Odoo, Django
Databases	PostgreSQL, pgvector (vector store)

Web Technologies	XML, HTML, JavaScript, jQuery, REST APIs
DevOps & Tools	Git, Docker, VS Code, PyCharm
Operating Systems	Windows, Linux

PROJECTS

► AI & GenAI Projects (2 Years)

Project A1: AI-Powered Helpdesk & Ticket Management System

Client: CSM Technologies Product

Role: AI Engineer / Full Stack Developer

Tech: Python, FastAPI, LangChain, LangGraph, OpenAI, PostgreSQL (pgvector), JavaScript, Odoo

- Architected and built a microservice-based Helpdesk platform comprising independently deployable services: Ticket Management, Customer Management, and Customer Feedback each as a separate Python/FastAPI microservice communicating via REST APIs.
- Designed and deployed an AI-powered customer-facing chatbot integrated into the website, enabling customers to create new support tickets, check live ticket status, and submit feedback by interacting conversationally using their customer number eliminating manual follow-up calls.
- Implemented an after-hours AI automation layer: when support agents' shift ends (post 6 PM), the system activates a LangGraph-based AI agent that autonomously handles incoming customer interactions resolving queries, collecting feedback, and creating new tickets ensuring 24/7 service continuity with zero human intervention.
- Built a daily AI-powered feedback summarisation pipeline using LangChain and OpenAI: for each support agent, the system aggregates all resolved tickets, analyses customer feedback sentiment, and generates a performance report showing how many customers were satisfied, dissatisfied, or neutral, and an overall agent performance score.
- Engineered RAG-based query resolution: the AI chatbot retrieves relevant knowledge base articles using pgvector semantic search before generating responses grounding answers in factual support documentation and reducing hallucinations.
- Designed the LangGraph agent state machine to handle multi-turn conversations, slot filling (collecting ticket details), and conditional routing handing off to human agents during business hours and to AI after hours seamlessly.

Project A2: ERP Operational AI Chatbot (Odoo + GenAI)

Client: CSM Technologies Internal Product

Role: AI Engineer / Full Stack Developer

Tech: Python, Odoo, LangChain, LangGraph, OpenAI, PostgreSQL (pgvector), JavaScript

- Designed and implemented a GenAI-powered conversational chatbot integrated within the Odoo ERP platform, enabling employees to query HR, project, and operational data using natural language.
- Built a RAG pipeline using LangChain and pgvector to retrieve contextual ERP records and generate accurate, grounded responses grounded in live operational data.
- Implemented LangGraph-based multi-step agent workflows for handling complex queries spanning multiple Odoo modules like Employee Handbook, Attendance, Recruitment, and Appraisal.
- Engineered prompt templates and context window management strategies to maintain coherent, relevant multi-turn conversations within a bounded context budget.
- Integrated the chatbot as an Odoo web widget using JavaScript and REST APIs, providing a seamless in-app conversational experience for employees.

Project A3: AI-Assisted Recruitment Screener & CV Analyser

Client: CSM Technologies (Kwantify ERP)

Role: AI Engineer / ERP Developer

Tech: Python, Odoo, LangChain, OpenAI, PostgreSQL, XML

- Developed an AI-powered recruitment assistant integrated into the Odoo Recruitment module to automate candidate screening and CV analysis.

- Built a LangChain + OpenAI pipeline to parse uploaded CVs, extract structured candidate data, and score applicants against job description requirements using prompt engineering.
- Automated candidate ranking and shortlisting using LLM-based evaluation, significantly reducing manual screening effort and time-to-shortlist.
- Integrated AI-generated scores and consolidated feedback summaries directly into Odoo applicant views for seamless recruiter access.

► ERP Projects (3 Years)

Project E1: Kwantify (ERP Platform)

Client: CSM Technologies

Role: Software Engineer

Tech: Odoo, Python, XML, PostgreSQL, JavaScript

- Requirement gathering, architecture design, and implementation of ERP modules for a 20-member team.
- Customised Recruitment module for multi-location hiring, consolidated feedback, meeting integration, applicant surveys, and notification emails.
- Customised Appraisal module for complex reporting workflows; developed DMS, Gallery, Employee Handbook, Survey, and Local Visit modules.
- Developed a Generate CV module and integrated web services for client applications.

Project E2: DPS Damanjodi (Website & Academics Platform)

Client: CSM Technologies

Role: Software Engineer

Tech: Odoo, Python, XML, PostgreSQL, JavaScript

- Designed and implemented DPS-CMS and DPS Academics modules for a school management system.
- Gathered requirements, designed module architecture, and delivered unit-tested implementations.

Project E3: Cab & Truck Booking Application

Client: Casper Technology Services Pvt. Ltd.

Role: Software Developer (Intern)

Tech: Django, Python, HTML, CSS, Bootstrap, JavaScript, jQuery

- Developed views and templates using Django, created REST APIs, database models, and responsive web interfaces.
- Implemented API integration with UI and performed API testing using Postman.

EDIFICATION SUMMARY

- B.Tech — Biju Patnaik University of Technology (2015 – 2019)
- Intermediate (12th) — DRIEMS Science College, Tangi, Cuttack (2013 – 2015)
- SSC (10th) — KGP High School, Bhagatpur (2013)

PERSONAL DETAILS

Address: At-Chintamanipur, Po-Bhagatpur, Dist-Cuttack, State-Odisha – 754022

Date of Birth: 17th October, 1997

Languages Known: English, Hindi, Odia, Spanish (Elementary Level)

Nationality: Indian
